

**WORLD
FIRST**
The only
computerised
golf glove in
the world!

Take it easy

World's first computerised golf glove

Monty's best tip to amateurs? Don't grip the club too heavily. And, thanks to this new piece of equipment, you won't make that mistake again. The SensoGlove looks and feels like a regular glove, but includes highly responsive and strategically-placed sensors which measure grip pressure 80 times per second. The sensors then feed the data into a

small computer attached to the back of the glove. The computer omits an audio signal to warn you to ease off if you grip too tightly.

Spec: Available in men's and ladies' left-hand only, sizes S-XL

£49.95 (special offer until Sept 21, replacement gloves cost around £12)

New GPS

Golf's 'best value' GPS

The V300 series by Sonocaddie uses the latest technology to provide golfers with precise distance information from any point on the course and has the "best value of all personal GPS golf solutions". It fits neatly in the palm of your hand and has a friendly interface that shows you your position on the course in real time – plus a new 3D colour course layout.

You can record your score with the digital scorecard and game analysis, track your game which is stored to review at a later date, and mark how far you have hit your driver with the touch of a button.
